# **HIGH SPEC PRE-CALVER MINERALS**

Feeding a high-quality pre calver mineral during the dry period is a crucial part in planning for the year ahead. It is one of the most simple and cost-effective measures to carry out in order to get cows on track for a productive, healthy and fertile lactation. Drinagh Co-op High Spec Pre-Calver contains an excellent health package with a new and improved formulation containing elevated levels of Vitamin E and 24% magnesium, boosting immunity and health. This with a balance of essential minerals, vitamins and trace elements ensures all the requirements are met for the cow and the new born calf

Element mg/kg Mineral	Drinagh High Spec Pre-Calver
<b>Vitamins</b>	
Vit A iu	500,000
Vit D3 iu	120,000
Vit E iu	8250
<b>Trace Elements</b>	
Copper mg	2000
Chelated cu mg	1500
Manganese mg	3000
Cobalt mg	100
Iodine mg	500
Zinc mg	3000
Zinc chelate mg	1500
