Constructing
a New Farm
Building in
2015?

Contact Michael Galvin at Drinagh Central
Hardware or Brian Hourihane in Skibbereen for
a quotation and advice on building materials.

PTO & PTO Guards

10% OFF

Soil sampling provides essential information regarding the nutrient status
of soil. Soil can be tested for pH, lime requirement, phosphorus (P) and
potassium (K). The results of the samples will provide information on the
areas of your farm that has low, medium or high soil fertility.

Soil samplers and sample boxes are
available for collection from Tim Regan
at Drinagh Central Office.

For more information call to your local Drinagh store or contact
Richard Murphy 086-8272057 or David Shiels 087-6863576
