Stock Withholding Days	3	2	2	2	14	2	14	14	5

## Sustainable Use of Pesticides Directive (SUD)

- Since November 2015, only a registered professional user can apply pesticides authorised for professional use only
- Individuals who are not registered as a professional user can buy pesticides authorised for professional use but these pesticides must be applied by a registered professional user. **There is a requirement to keep appropriate records with details of the registered professional user who applied the pesticides.**

## Sprayer Testing Service

- Under EU Legislation, all sprayers with a boom greater than 3 meters must be tested by a registered Inspector of Pesticide Application Equipment
- The interval between inspections must not exceed 5 years until 2020 and must not exceed 3 years thereafter
- New equipment must be inspected at least once within a period of five years after purchase. Sprayer testing can be carried out in Drinagh by our Department of Agriculture registered technician. Contact James Walsh on 028-30800 to arrange a test

## Rush Control Best Practice

1. Spray rushes when actively growing — ideally around 24cm — if rushes are strong top first and spray regrowth
2. Using a sticker such as 'Torpedo II' at 100ml per 100 litres of water will increase the efficacy of the chemical
3. Aim to have 48 hours dry after spraying to ensure good uptake (do not spray when rain is forecast)
4. Top rushes approx 4 weeks after spraying to allow grass to thicken
5. Refer to the Drinagh Sprays Brochure for recommended products and usage rates

## Thistles

Product	Rate/Ha	Weeds Controlled
Agritox MCPA	2.75 litres/Ha	Moderate on Thistles, Rushes, Ragwort
Thistlex	1 litre/Ha	Creeping Thistles, Sow Thistle, Spear Thistle
