

Drinagh is currently recruiting a Process Control Operative to join our team in the Feed Mill in Drinagh Central

The core responsibilities of this role will include operating the computerised process control system to oversee blending and cubing processes in line with company policies and UFAS quality assurance requirements, and other ad hoc duties as required

The ideal candidate would possess the following skills:

- Proficiency in computer software packages for process control, e.g. Scada.
- Strong logistical and multitasking abilities.
- Mechanically minded/oriented.
- Effective communication skills for interacting with production team, suppliers and customers.
- Ability to work flexibly and on own initiative.
- Willingness to work in a team environment.

Training will be provided on the job but previous experience and a keen interest in animal feed manufacturing will be a benefit.

This is a permanent, full-time role.

Please email cover letter and CV to donalmurphy@drinagh.com on or before Friday, 21st November 2025.
